Your trusted name in complete fleet management since 1999.

Annual fuel theft can set your fleet business back exponentially year on year. Soltrack's Fuel Probe units provide instant live updates that flag dips and rises in the fuel tank.

Manage your fuel costings, route and driver behaviour effectively with Soltrack's fuel probe. Tanks are calibrated to within 1% accuracy and fuel is monitored in real time.

Fuel Probe Features:

Hardware:

-  Probe length can be cut up to 70% of length
-  Fuel Probe has a low case profile and can be installed into limited spaces
-  Configurable thermal correction based on ambient temperature
-  Available as both a single or dual probe

Software:

-  Monitors fuel consumption
-  Monitors average usage of dual tank & tank level
-  Produces fuel graph with pre-set targets
-  Integrated into Google maps for accurate positions of fuel fill ups or theft.

Road Alert:
Soltrack's Fuel Probes are integrated into the Soltrack's Skylink™ Fleet Management System through the unique Soltrack's Skylink CANBUS clip. Skylink FMS has a full technical team- 24/7 help desk and 24/7 control room for customised vehicle alerts and hijackings.
