Skyfleetcare.co.za

YOUR TRUSTED NAME IN COMPLETE FLEET MANAGEMENT

SkyFleetCare

A comprehensive fleet maintenance software/ solution focused on increasing vehicle presence on the road while saving money in the non-core business section with:

- automated maintenance management,
- job-card production for internal fleet vehicle workshops,
- report management, and
- spare-part/s pricing control.

A fleet maintenance management solution enhances your fleet's dependability and reliability; while streamlining your organization's daily operations.

Fleet Maintenance Objectives:

- Assist internal workshops in managing workflow and turnaround times.
- Improve vehicle performance/availability/ longevity.
- Reduce vehicle repair turnaround times.
- Provide precise fleet reports and maintenance forecasting.

Benefits of Fleet Maintenance:

Financial Benefits

- Reduces administrative work - only uses 1 platform and all other data sources will be integrated.
- Assists in forecasting maintenance for budget planning and reducing wasteful maintenance.
- Standardizes pricing on a national scale.

Technical Benefits

- Increase vehicle productivity by decreasing repair/service downtime.
- Access the maintenance management system from anywhere.

Training will be provided to assist controllers in scheduling vehicle service and maintenance and in making correct, effective, and efficient decisions regarding repair requests.
